

Wyoming Breastfeeding Report

Breastfeeding is a proven primary prevention strategy, building a foundation for life-long health and wellness. Here's how Wyoming's breastfeeding rates and other measures (2015 births) compare to national rates and targets set by the Healthy People 2020 initiative.

BREASTFEEDING RATES & PROGRESS	% ever breastfed	% duration to 12 months	% exclusive at 6 months	% of births at Baby-Friendly facilities	# of Baby-Friendly facilities
Wyoming	90	38.6	28.8	2.4	1
U.S. National	83.2	35.9	24.9	26.1	555
HP2020 Target	81.9	34.1	25.5	8.1	N/A

A 2016 study published in the journal *Maternal & Child Nutrition* quantified excess cases of pediatric and maternal disease and death and associated costs attributable to suboptimal breastfeeding (using rates for 2014 births and defining "optimal" as 90% of infants breastfed according to medical recommendations). Here's how Wyoming's costs resulting from sub-optimal rates compare:

COSTS OF SUB-OPTIMAL BREASTFEEDING RATES	Medical Costs of Sub-Optimal Rates	Non-Medical Costs of Sub-Optimal Rates	Death Costs of Sub-Optimal Rates
Wyoming	\$4,242,374	\$1,834,213	\$16,998,859
U.S. National	\$2,405,023,438	\$1,093,681,596	\$10,798,725,299

Federally Funded Breastfeeding Project

Health Resources & Service Administration, Maternal and Child Health Bureau

- Through a **Title V Maternal and Child Health** grant, Wyoming has chosen increasing percentage of infants who are ever breastfed and infants breastfed exclusively through 6 months as one of their National Performance Measures.

Your State Breastfeeding Coalition

The USBC is affiliated with breastfeeding coalitions in all 50 states that carry out activities at state/local levels.

Wyoming Breastfeeding Coalition

The Wyoming Breastfeeding Coalition's mission is to improve the health of Wyoming residents by working collaboratively to protect, promote, and support breastfeeding among breastfeeding advocates and families at home, in healthcare facilities, workplaces, childcare, and educational institutions.
